CYBER SECURITY IN THE MARITIME INDUSTRY

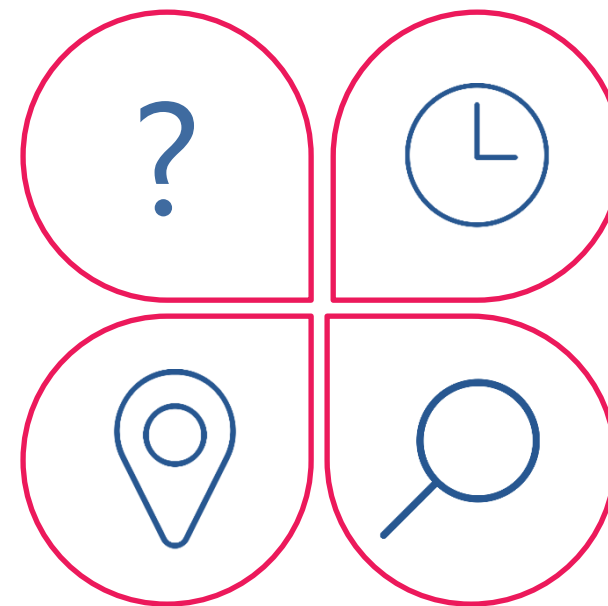

In June 2017 the MSC issued MSC.428(98) which requires that cyber risks are appropriately addressed in ISM safety management systems.

What

Companies operating approved SMS must ensure that IT systems are risk assessed – including systems used to operate the vessel – and procedures put in place to manage all cyber security risks.

Where

The requirement applies to all vessels in operation and company infrastructure ashore. Due to cyber threats from external sources this includes interactions with suppliers, customers, port operators, agents, regulators and other third-parties.

When

All risk assessments, procedures and training need to be completed before the first annual verification of the company's Document of Compliance after 1 January 2021.

Why

There have been several high-profile security attacks on large shipping companies in recent years, as well as speculation in the global press regarding ship cyber attack vulnerabilities and the potential catastrophic consequences.

THE EAZI APPROACH

DPA's need to show that they have assessed the risks and are managing them to ALARP. In this respect, cyber security is no different to any other risks faced on board.

Eazi Watch

Free comprehensive audit using software that will analyse your vessel and ashore systems to pinpoint risks and vulnerabilities. It provides a report that you can take to internal stakeholders, complete with actions.

Eazi Solution

Eazi Security then design, implement and manage a solution that targets the risks identified in your Eazi Watch report. Solutions combine Cisco Security Technology, SMS procedures and ISO Certification where required.

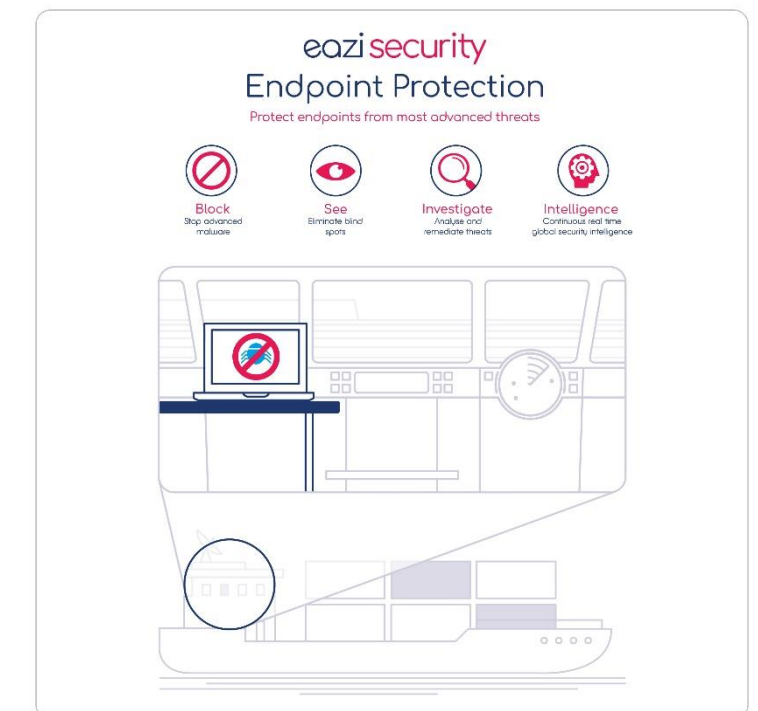

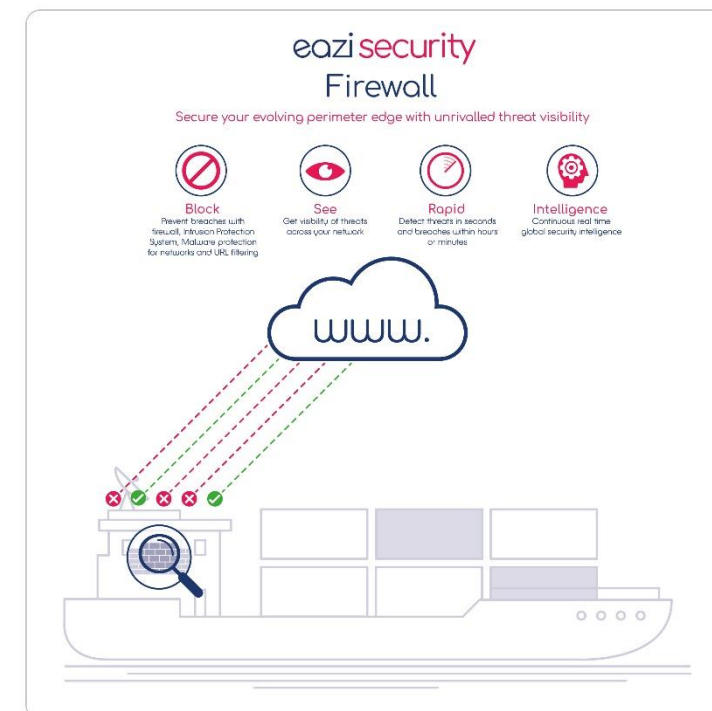

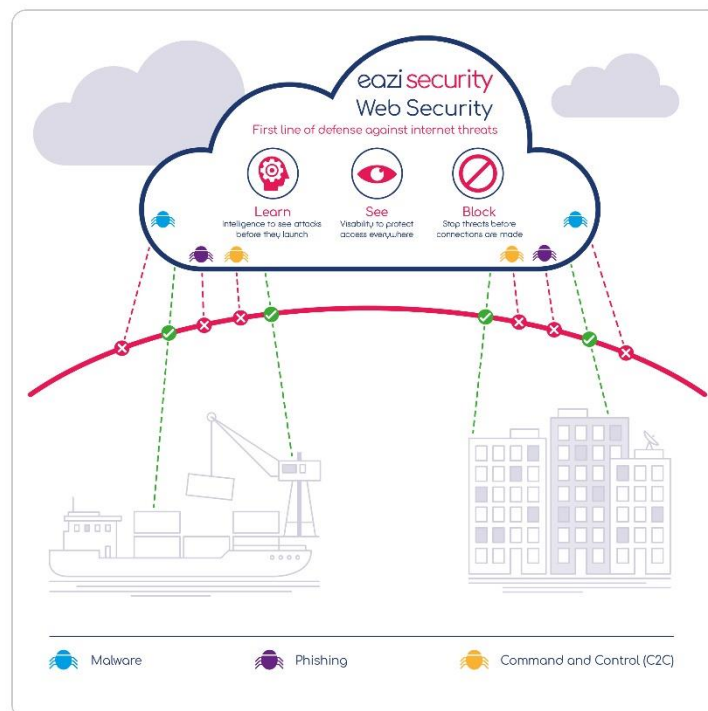

Eazi Pay

Eazi Security offer flexible payment options to meet your preference for OPEX or CAPEX models, with pay monthly subscription or annual 1, 3 or 5 year licensing.

THE EAZI SOLUTION

The Eazi Solution will target the specific risks identified in your Eazi Watch report and will incorporate Web Security, Email Security, Firewall and/or Endpoint Protection as required.

EAZI WATCH Report and Recommendations

SMS Policies, Procedures, Checklists and Audits Integrated with Existing SMS Systems

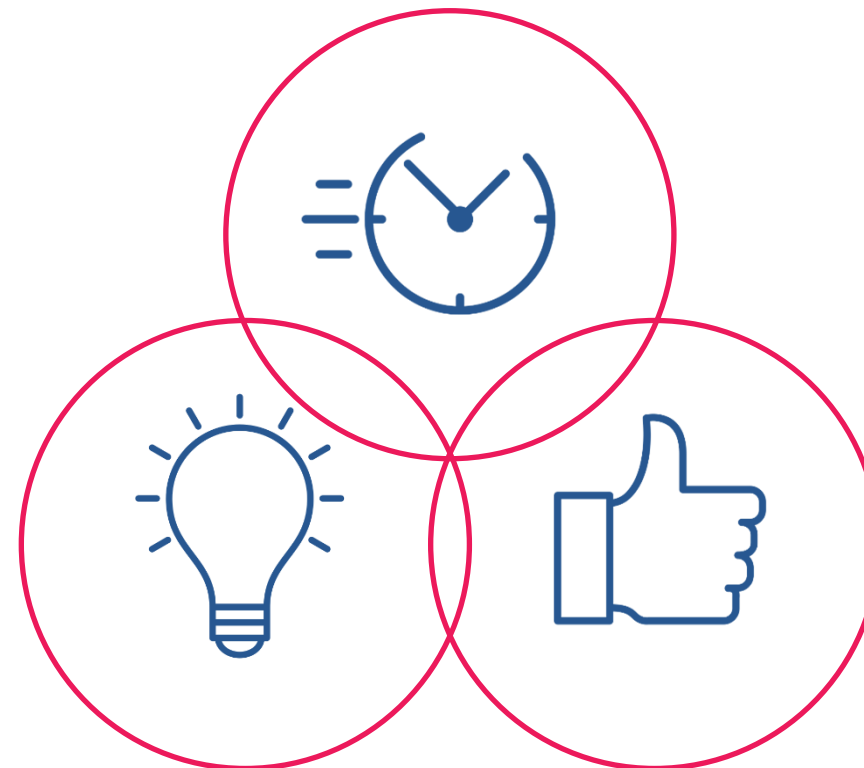

WHY CHOOSE EAZI SECURITY

Better

Every aspect of your cyber security and risk management will be designed, implemented and controlled in a cohesive and seamless manner, resulting in a better outcome.

Faster

Working with one company for your entire cyber security needs will not only ease the management burden but will speed up and streamline implementation.

Simpler

Nowhere else will you find a partner that offers expertise in security technology, compliance, shipping systems and the maritime sector wrapped into a single solution.
